

# Edinburgh Mini Maker Faire®

## MAKERS WANTED

Sunday 20 April, 2014  
Summerhall

The 2013 Edinburgh Mini Maker Faire was a resounding success with 3,000 visitors joining us in a celebration of creativity, innovation and making stuff! Our makers really did 'make it', with over 100 showcasing their DIY wares and inventions. We couldn't have asked for much more from Scotland's first ever Maker Faire.

Here's the great news – we're doing it all again! We are on the hunt for people who love to make things – whatever that may be. The 2014 Edinburgh Mini Maker Faire is going to be bigger and better than last year. So if you like to tinker, invent or build, this is your chance to show off your work and meet other people who love to do the same.

For more information visit our website:  
[www.makerfairedinburgh.com](http://www.makerfairedinburgh.com)

### Tinker, tailor, homespun maker

Much like last year, there will be workshops, demonstrations, interactive shows and talks throughout the day. We want to showcase the skills and ingenuity of people from across Scotland and beyond. From traditional crafts to innovative technologies, rapid prototyping to skills honed over years of practice.

Individuals, clubs, schools, small/local businesses and enthusiast's groups are all encouraged to get involved. If you'd like to participate in Scotland's largest Maker Faire, have a think about what you could bring to the faire and fill out our **online form**.

Please ensure that there is one person who can be the main point of contact for the Mini Maker Faire. The deadline for submissions is **18 December, 2013**.

### What we are looking for

Here are some examples of the kinds of things we would like to see at the 2014 Edinburgh Mini Maker Faire:

Mechanics projects – Animatronics  
Models – Bespoke electronics  
Crocheting – 3D printing – Screen printing – Toys/games – Quadcopters  
Wild bicycle designs – Musical instruments – Software projects  
Robotics – Board games – DIY bio  
Open source mapping – Small scale wind turbines – Recycled arts – Home grown apps – Blacksmithing – Boot-making  
Kitchen chemistry – Wearable technologies – Haptics – Pedal powered tech – Sustainable design – Puppetry  
Science demos – Creative foods

Happy tinkering!
